I've already tried a similar thing, but then I have a ScrollView wrapping it all inside a grid, and it just couldn't be done without using a custom control. But I feel like the solution I've used would be shortsighted because it just bypassed the benefits of the GridView -- not to mention if you have a CarouselViewer it isn't necessary because the GridView controls the layout, providing perfect compatibility. I simply want to remove the ScrollView and just have a GridView control. A: I put a few different ways together, but it doesn't duplicate your end-result. In fact it's a little different from your end-result. There isn't a compatible property for GridView that is everything you want. You'll have to mix and match the various features of a ScrollView and a GridView to get what you want. Here's the basic thing to render your end-result:

www.konami.com Gotta buy this game now. I couldn't stop playing. The game looks great and sounds great. Your review is spot on too, about the animated cutscenes, they may be a bit too much, but when they pop up it's great. Really like the art style of the game. Designing a character isn't as complicated as people seem to think it is. A little balance between those two "weaks" lets your character develop well, otherwise it'll be like playing Dark Souls, which isn't a bad thing either. The music is great too, I always enjoy a good action/RPG soundtrack, it's not intrusive but fits the game perfectly. Can't wait for more action RPG's to come out like this. It's been a while since I've played a good action RPG, I'm glad I found this one. This is definitely a must buy. If you like playing action RPGs, then go and get this game now. You will not regret it. Thoroughly fun game, I love the style/lighting/visual quality. In fact, I don't know how you do this style but I'd love to give it a try. One small nitpick: the cutscenes appear as text, rather than the visuals. Overall, though, an amazing game. This game is what I've been waiting for for a long time now. I've always wanted to see a well-made Dragon Quest game (not just Dragon Quest Swords or Dragon Quest VII, but the real Dragon Quest for a console). The game still doesn't have much content, but the game itself is very solid and has a lot of potential. I especially like the game's world-building style, and the lighthearted (but also realistic) humour makes it really nice. I also like that it's based on the Dragon Quest series, and I enjoy the gameplay style of the game too. If you want to know what I'd like to see in a Dragon Quest game, here's what I'd like to see: more "realistic" combat, the ability to level-up, be able to customize your character in various ways (like classes, weapons, armor, and even magic), and more story content in the form of optional events/quests (maybe even a bit of open world bff6bb2d33
