Spastic Paraplegia. Textbook Of Medicinal Chemistry By The present communication has been made for the purpose of conveying knowledge on the nature of inheritance, the genealogical position and possibilities of the employment of the plants of the forest in relation to forest conservation. The plant, when in a state of reversion, sometimes shows its reversion, and can breed itself. Textbook Of Medicinal Chemistry By The object of this paper is to consider the difficulties in the prosecution of the work in hand; to examine the various sources of evidence; to bring out in detail the structural features of the various specimens, and to point out at the same time their extent and characteristics; to bring out the different methods of classification in evidence. Textbook Of Medicinal Chemistry By The early history of the part of the subject next to be considered, of the botany of medicinal plants, is somewhat better known. Textbook Of Medicinal Chemistry By Now the tree is not in the air, it is in the water, and again, it is in the air. Textbook Of Medicinal Chemistry By In the author's view, India is the largest producer of asafoetida, but currently its export has been jeopardized by certain countries that include China, Japan, and the USA. Textbook Of Medicinal Chemistry By From the early history of the subject next to be considered in this article it will be seen that there are certain features in the problem the state of the subject generally, and which

I have a variable (Boolean) named 'enter', when enter is True, then I need to call the following function: `def print_exam_result(question_no, correct_answer): print('Q', question_no, 'Correct answer is: ', correct_answer) def main(): print('Welcome to the MCQ Exam! Your total time is', question_time) while question_time > 0: question_no = int(input('Enter Exam number')) question_time = int(input('Enter your time')) student_answers = raw_input() student_answers = student_answers.split() print_exam_result(question_no, answers_answers[question_no - 1]) question_time = int(input('Enter your time')) print("Thank you for taking the test, you have answered successfully!") if __name__ == "__main__": main() Output: Welcome to the MCQ Exam! Your total time is 1 Enter Exam number1234 Enter your time15 Enter Exam number1234 Enter your time15 Enter exam number1234 Enter your time15 Enter exam number1234 Enter your time15 Enter exam number1234 Enter your time15 Enter exam number1234 Enter your time15 Enter exam number1234 Enter your time15 Thank you for taking the test, you have answered successfully! Why am I getting this error? I got the feeling that I'm doing something very wrong... I've tried to look for`

someone getting the same error and they had similar problem with unicode but, not the same condition A: You are always getting this error, because you are always changing a input which you're not expecting to be unicode! Fix This is always where the problem is: `question_time = int(input('Enter your time'))` Int's have to be unicode, i.e., they must be encoded into uppercase, so:
